Mentorship from Exemplary
Mathematicians
Elegant Problem Solving

Opening October 3rd

Our Faculty

Titu Andreescu Over 30 years experience teaching and coaching tomorrow's problem solvers.

Naoki Sato From IMO competitor to educator, a career dedicated to our brightest minds.

Oleg Mushkarov Educator and author with a passion for identifying and guiding mathematical talent.

Răzvan Gelca From high school competitions to Putnam, decades of experience working with dedicated problem solvers.

Go to www.awesomemathacademy.org/about to see the full faculty list.

Your Future Awaits

Problem solving is the cornerstone to every adventure. At AwesomeMath Academy, we have dedicated our careers and resources to guiding talented middle and high school students towards excellence in problem solving through preparing for math competitions. Developing the critical thinking skills necessary to solve interesting problems in multiple disciplines, such as Number Theory, Algebra, Geometry, and Combinatorics, prepares students not only for excelling in math competitions, but in life as well. They learn there is more than one way to approach a problem and gain the confidence necessary to take risks and explore options.

By working with our faculty and like-minded peers, they can progress faster in their studies through collaboration. Our students learn to lead and work in teams to further their education and gain skills by trading ideas.

Based on the successful AwesomeMath Summer Program, AwesomeMath Academy awaits for your registration. Seating and class sizes are limited, reserve your spot today!

How to Apply?

It's simple, go to www.awesomemathacademy.org for our admissions guidelines and pricing plus more detailed class times and information. Feel free to call or email with further questions, (214) 549-6146 or <mailto:awesomemathacademy@gmail.com>.
